<sup>1</sup> Data in this table represents quantities of synfuel distributed to the designated States and sectors as reported to EIA by synfuel producers.

<sup>2</sup> Other States include California, Georgia, Illinois, Maryland, Michigan, Minnesota, North Carolina, Tennessee, Utah, and Virginia.

W = Withheld to avoid disclosure of individual company data.

Note: • Total may not equal sum of components because of independent rounding. Electricity Generation includes the "electric power sector" (utility generators and independent power producers) and industrial and commercial power generators, including combined-heat-and-power producers, but excludes units at single-family dwellings. All Other Sectors may include coke plants, manufacturing plants, residential and commercial sector, and/or agriculture, mining, and construction sectors.
